

4 February 1955

25X1A Attn : [redacted] Classification Control Officer for [redacted]

25X1

25X1 Declassification of [redacted] Translation No. 293

25X1 Ref: Your memorandum, dated 26 October 1954, subject "Possible Over-classification of [redacted] Translation No 293"

1. Classification of subject Translation was applied originally to conform with that of the original language document borrowed from the Air Force.

2. Inquiry has resolved that unclassified translations of the same work now are available, and that subsequent to 1951 the Air Force declassified the original book.

3. [redacted] has now declassified Translation No. 293, maintaining the control "For Official Use Only" under the customary caveat requiring sanitizing as to CIA identification for dissemination outside the [redacted].

4. The CIA Classification Control Officer has been informed of this action.

DATE: 26 October 1954

25X1

FROM : [REDACTED]

SUBJECT: Possible Overclassification of [REDACTED] Translation No. 293

25X1

1. Mr. Kuiroz, Directorate of Climatology, Hq., Air Weather Service, Code 185, Extension 82286, called today with information which he thought would be of interest. He has noted that two other translations, both unclassified, exist of the material covered in [REDACTED] Translation No. 293. 25X1 which is classified Secret.

2. Both translations he says are on file at the Weather Bureau Library, under the same title and author as given in [REDACTED] Translation No. 293. 25X1 The last time he used the translation it was still uncataloged but had a Translation Processing Number of either 2197 or 2198. Should you wish to examine the unclassified translation he is sure it can be obtained by inter-library loan.

3. He has also noted that the same source has abstracted in detail from an open source "The Arctic Bibliography". He mentioned the Arctic Institute of North America, Montreal, Canada.
